DESCRIPTORS: *Hematology, *Electrocardiography,
Diseases, *Pancreas.

Deterioration of the functional capacity of the cardiovascular system is of reflex origin in acute pancreatitis, as shown by a drop in arterial and venous pressures, slowing of the rate of blood flow, and the appearance of pathological shifts in the EKG. These changes, functional in nature, are indicative of decreased vascular tone and lowered myocardial function. The therapy (Biological Sciences--Pathology, TT, v. 10, no. 6) (over)
